

FORTIFY SKY

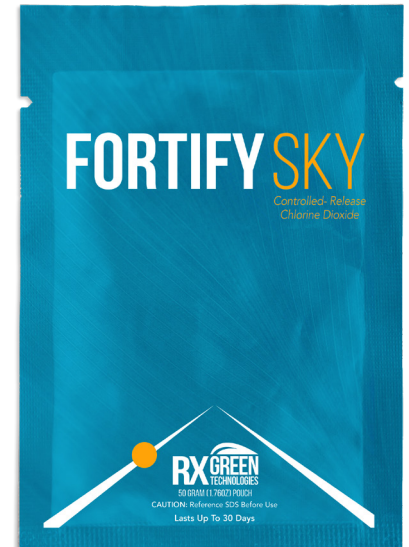

CHLORINE DIOXIDE TECHNOLOGY

FORTIFY SKY is a portable, moisture-activated, chlorine dioxide generation system that has the power to **maintain clean surfaces** and facility air with unmatched effectiveness, leaving no residue or post-treatment cleanup requirement. The controlled release technology in FORTIFY SKY emits trace amounts of chlorine dioxide, making this a safe product to use for routine odor control.

FORTIFY SKY

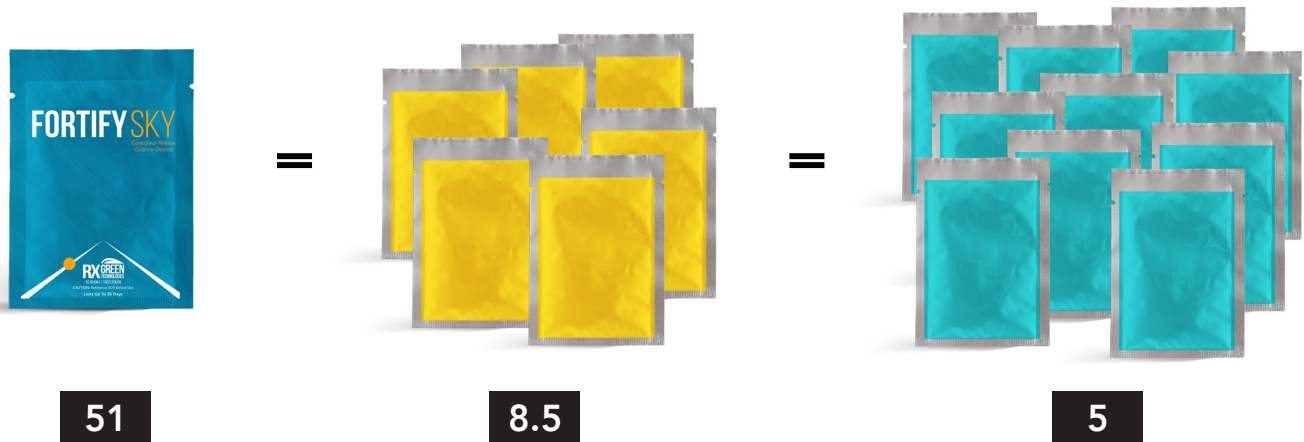

- ✓ A versatile humidity-activated pure chlorine dioxide gas generation technology.
- ✓ NO chemical mixing, and NO expensive generator technology.
- ✓ Perfect for routine odor control in cultivation facilities.
- ✓ Inexpensive and scalable to any size facility.

TARGETED APPLICATIONS

- Clone rooms
- Veg rooms
- Flower rooms
- Curing rooms

FORTIFY SKY releases **6x and 10x** more ClO_2 than the next leading brands.

Peak ClO_2 Output in Test Chamber (ppm/cu.ft)

INSTRUCTIONS

Please wear gloves and eye protection while handling this product.

1. Use one 50g pouch to treat up to 7,000 cubic feet. To treat an area larger than 7,000 cubic feet, use additional pouches at equal spacing.
2. Carefully open outer foil packet and remove inner pouch. Do not open inner pouch.
3. Place inner pouch a minimum of 12-18 inches above plant canopy by hanging via hole in pouch.
4. Inner pouch is effective for up to 30 days of use.
5. Avoid direct exposure to water.
6. Please dispose of packet in accordance with local regulations.

Please refer to product safety data sheet for product safety information.
