

Clean Coco Lot Code Explanation

Each order of Clean Coco contains a lot code on the placard attached to the outside of the pallet. Lot codes contain a 12-13 digit number and are separated into 4 parts, as shown below.

Lot number format:

Product Type (100, 70/30) — Production Machine and Date — Run Sequence of the Day

Examples:

100% Clean Coco	100 – N081321 – 01
70/30 Clean Coco	7030 – N081321 – 01

The production machine and date (N081321) is an internal lot code that allows traceability to manufacturing location and raw materials. The batch code (01) is an internal code to identify machine run and internal quality checkpoints.
