

CUTTING-EDGE CHLORINE DIOXIDE CLEANING TECHNOLOGY

Our powerful chlorine dioxide cleaning solutions are designed to help cannabis cultivators maintain clean, sanitary environments with ease. Fortify Cloud generates pure chlorine dioxide gas for deep disinfection, while Fortify Sky utilizes controlled-release technology to maintain ongoing cleanliness with trace amounts of chlorine dioxide. Both products effectively eliminate pathogens and odors without leaving residue or requiring post-treatment cleanup, making them the ideal choice for protecting plants, equipment, and staff in commercial cultivation facilities.

POWERFUL & PORTABLE

SAFE & ODORLESS

CLEANING EFFORTS**

WHAT MAKES OUR CULTIVATION CLEANING PRODUCTS DIFFERENT?

- We send every product to a third-party testing lab to help ensure the health and safety of your crop. If a product doesn't meet our standards, it doesn't leave our warehouse.
- We sell directly from vertically integrated manufacturing sites to commercial growers, with an end-to-end process that ensures faster availability of products you need.
- We partner with suppliers who focus on sustainability as well as environmentally safe practices for the betterment of the planet and the communities they operate in.

CLEANING & SANTIZATION SOLUTIONS

FORTIFY SKY

FORTIFY SKY is a portable, moisture-activated, chlorine dioxide generation system that has the power to maintain clean surfaces and facility air with unmatched effectiveness, leaving no residue or post-treatment cleanup requirement. The controlled release technology in FORTIFY SKY emits trace amounts of chlorine dioxide, making this a safe product to use for routine odor control.

FORTIFY CLOUD

Fortify Cloud is a portable, water-activated chlorine dioxide gas generation system that has the power to disinfect surfaces and facility air with unmatched effectiveness, leaving no residue or post-treatment cleanup requirement. The Fortify Cloud chlorine dioxide system creates pure chlorine dioxide gas on-site making it perfect for routine disinfection and odor control between harvests.

BENEFITS (SKY & CLOUD)

- Versatile water-activated pure chlorine dioxide gas generation technology
- NO chemical mixing and NO expensive generator technology are required
- Perfect for routine odor control and disinfection in cultivation facilities
- Inexpensive and scalable to any size commercial facility

TARGETED APPLICATIONS (SKY & CLOUD)

- Clone rooms
- Veg rooms
- Flower rooms
- Curing rooms
